

# National Aquatic Centre

## Fact sheet August 2025

A new National Aquatic Centre will be developed at the existing Centenary Pool site at Victoria Park in Spring Hill, providing an iconic home for Australia's four peak aquatic sports: swimming, artistic swimming, water polo and diving.

Purpose-built to cement Brisbane as Australia's leading destination for aquatic events, the National Aquatic Centre will sit within the exciting master-planned Victoria Park precinct, co-located with Brisbane Stadium and transport connections.

With a Games capacity of 25,000 and legacy capacity of 8,000, the centre will feature a main and secondary stadium, each with large indoor pools to support elite training and competitions.

The National Aquatic Centre is planned to host the majority of aquatic sports in 2032, supported by the Brisbane Aquatic Centre, located at Chandler Sports Precinct, which will undergo necessary upgrades.

## Features and benefits

### Queensland's aquatic icon

Following the Games, aspiring aquatic athletes of Queensland will have access to a national hub and high-performance centre, supporting the next generation of champions.

### Attracting future competition

World-class athlete and spectator facilities will provide opportunities for Brisbane to host future national and international competitions, further strengthening Brisbane as a global destination for sport and tourism.

### Enhanced community infrastructure

Set to transform a valued community asset, the new centre will deliver benefits beyond high performance use, such as enhanced amenities and greater community access to world-class aquatic facilities.
